

High Protein

DESCRIPTION

This product is intended for species that in the wild consume a great variety of fruits and seeds with low to moderate fat content (*Amazona*, *Cacatua*, *Psittacula*, etc.).

Maintenance foods are formulated to be fed to pet birds and breeding birds during non-reproductive periods. Their composition meet the nutritional requirements of birds during these periods.

FEEDING RECOMMENDATIONS

It is designed to constitute 100 % of the parrot's diet in non-reproductive periods. However, if fresh fruit and vegetables are provided daily to give variety to the diet, High Protein formula should constitute no less than 70 % of the total intake.

No vitamin or mineral supplements should be given to parrots whose staple food is High Protein formula.

Renew feeder with fresh food and water daily.

Once the package is opened, store in an air-tight container in a cool, dry place.

DAILY INTAKE

Birds consumption varies between 5 and 15 % of body weight. Medium-sized species (for example, Amazon parrots) consume around 20-40 g per day.

NUTRITIONAL INFORMATION
